 AB - J09302207 A transparent film for liquid jet recording comprises mainly a composition containing a lactic acid type polymer. Also claimed are:
 (a) the film comprises mainly a composition containing a lactic acid type polymer and an ethylene-vinyl acetate copolymer; (b) the film comprises mainly a composition containing a lactic acid type polymer, an ethylene-vinyl acetate copolymer and a lubricant; (c) the film is applied by a coating agent of gelatin, casein, starch, sodium alginate, carboxymethylcellulose, cationated starch, hydroxyethyl cellulose, polyvinyl acetate and polyvinyl alcohol.
 - USE - The film is used as OHP (over head projector) film which is well printed independently on the kind of the printing machine.
 - ADVANTAGE - The film has excellent light transmittance, anti-scratching property, printability without printing unevenness and is also biodegradable.
 - (Dwg.0/0)
